What we are About

Global is about a NEW ERA in serious skin care with a medical approach. We have incorporated the use of excellent skin care products together with the world's best non invasive laser treatments to serve our clients with the best Skin Care and Laser technology available in the industry today. It is made up of highly educated and forward thinking women and men between the skin care and medical industries to work together to achieve the best results for our clients.

The Global Aesthetic Centre began its operation in 1999 as a skin Care Centre in a Medical facility offering the best in professional Skin Care and non invasive Laser Therapies, working together with Plastic Surgeons and Dermatologists to offer our client the best in Serious Skin Care. Since then, we have opened our second Skin Care Centre in 2003 and more are to follow shortly. Our growth has occurred in large part because of our dedicated employees. Welcome to the company where "people make the difference".

Nimue

ActiveFX Fractional Co2 Laser Resurfacing

A new procedure that yields remarkable long lasting results. Office-based procedure with minimal patient downtime.

How does it work?
During an ActiveFX fractional resurfacing procedure, a high-energy beam of laser light interacts with the skin's surface, causing the upper layer to peel off and regenerate a layer of new, healthy skin.
P.O.R.

Laser Therapies

All treatments start with a free consultation during which the laser process will be explained and contra-indications will be discussed.

Aesthetic Procedures

Botox

One of the most popular temporary wrinkle removal techniques available. It works by relaxing the facial muscles that contracts and causes wrinkles such as frown lines between the eyebrows and crow's feet. Over time these wrinkles will become permanent even when you are not frowning. You will be delighted to see how these wrinkles will smooth out over a few days and restore your face to a more youthful and relaxed look - P.O.R.

Fillers

Fillers can be injected into the laugh lines (labial nasal folds) that stretch from your nose to the side of your mouth. Fillers are also used to increase the volume of your lips, giving a more healthy and vital appearance - P.O.R.

Sclerotherapy

Sclerotherapy is a medical procedure used to treat varicose veins and "spider veins." During sclerotherapy, the physician injects a solution directly into the affected vein. The solution irritates the lining of the vessel, causing it to swell and stick together. Over time, the vessel turns into scar tissue that fades from view. Sclerotherapy is a well-proven procedure and has been used since the 1930's. - P.O.R.
